"The Road to Success is Always Under Construction" - Larry Wall and Kathleen Russell

Dear Colleague:

This slogan applies perfectly to the fund raising campaign of the Canadian Foundation for Geotechnique (CFG). For years, the CFG has been complimented for the financial support it provided the CGS for its National Awards Program for engineering students, engineers, the Colloquium, and the Cross Canada Lecture Tours. The CFG is able to provide this support from the charitable donations it receives each year from individual members and geotechnical firms. (Donors published in the September Issue of Geotechnical News).

I am writing to encourage you to support the CFG, which is devoted exclusively to recognizing and honouring so many of our own. To support the "Foundation" and its national program, please fill out the form below and mail it with your donation to

David Harding, Water and Earth Science Associates Ltd,
PO Box 430, 3108 Carp Road, Carp (Ottawa), Ontario K0A 1L0 , or:

You may choose to add your donation to the annual Fee Statement provided by the CGS, who will forward it to the CFG.

Thank you in advance for your support. A receipt for income tax purposes will be mailed to you.

Sincerely,

Tim Law, P.Eng.
President / Président
tlaw@ccs.carleton.ca

PS. The CFG/FGC (and its predecessors) has been working for you and the geotechnical community since 1970. Wouldn't you like to give something back to that community?
